

**ICE-CREAM BULK FILLING MACHINE** 

# **ICE-CREAM BULK FILLING MACHINE**

### **Application**

COLDTECH Semi-automatic bulk filling machine has been designed to fill rectangular or squared bulk and also for Cup with a capacity from 50ml to 5 ltr. approx.

Working in-line with continuous ice-cream freezers, this machine can fill up to a maximum of 3 flavourous simultaneously.

## Mechanical features and working principle

This particularly stout construction machine, made of S.S 304, has been conceived for small and medium size ice-cream industries.

### The basic machine includes:

A stainless steel sliding table, provided with adjustable supporting guides, conceived to allow different sizes of bulks, on which the operator shall put the bulk to be filled.

A stainless steel time elapse filler, connected to one or various continuous ice-cream freezers. this filler goes directly down into the bulk, fills it up to the programmed weight and then, comes up again. this cycle starts again to fill the other bulk.

Filler vertical movement is pneumatically driven. Dosing cycle is variable and can be controlled by a timer. adjustable feet.

# **TECHNICAL SPECIFICATION**

COLDTECH

1500 TO 2,000 Cups & 200 to 500 Bulk per hour

**ICE CREAM** 

Semi automatic

Up to 120 ml as required

SS 304

6 kg/cm<sup>2</sup>

**Electric** 

445mm (L) x 645mm (W) x 1465mm (H)

45 kg.
